**Projects located at Eastern Goldfields,
Western Australia**

- Kurnalpi (100%)
- Lindsays (100%)

The Board of KalNorth Gold Mines Limited ("KalNorth or the "Company", ASX: KGM) is pleased to report on activities and progress made during the September 2018 Quarter.

Highlights

Kurnalpi Project

Following a program of 1,446 metres air-core drilling in the June 2018 quarter, which did not record any significant intercepts, the Company had planned drilling of additional targets, including the Schiedam Prospect, in the September Quarter. However, this has been delayed by wet weather and drilling is now planned to commence in this current quarter.

Lindsays project

During the Quarter, the Company continued to hold the Lindsays project under care and maintenance and in compliance with environmental regulations, thus allowing for a resumption of mining activities with minimal lead time. The Company continued its strategic review of the project and progressed discussions with several interested parties to redevelop or divest the project.

EXPLORATION REPORT

Kurnalpi Project (100% KGM)

Drilling Program Delayed

In the June Quarter, the Company finished stage 1 of a wide spaced air-core drill programme for an aggregate of 1,446 metres (refer to ASX announcement on 31 July 2018). The plan was to test potential gold targets in the north and south extension areas along the Brilliant prospect mineralisation corridor as well as other targets which were identified from the 2015 multi-source geophysical interpretation and project review and targeting exercise conducted by CSA Global in 2016; however no significant gold intercepts were identified.

The Company planned further drilling to test other targets including the Schiedam Prospect defined in mid-2016 (refer to ASX announcement on 10 June 2016) but was delayed by wet weather and will commence the drilling in current quarter.

Lindsays Project (100% KGM)

During the Quarter, the Company continued to hold the Lindsays project under care and maintenance and in compliance with environmental regulations which will allow any future mining activity to resume immediately.

The Company continued its strategic review of the project and has progressed discussions with several interested parties to redevelop or divest the project.

CORPORATE REPORT

Convertible Loan Repaid

The Company had a \$2 million convertible note facility made available to it by the then largest shareholder Cross-Strait Common Development Fund Co., Limited ("Cross Strait") (refer to ASX announcement on 16 September 2015), of which \$1.3 million was drawn down. The facility expired on 30 April 2018 and had been fully repaid by the Company from existing cash reserves in this quarter (refer to ASX announcement on 11 September 2018).

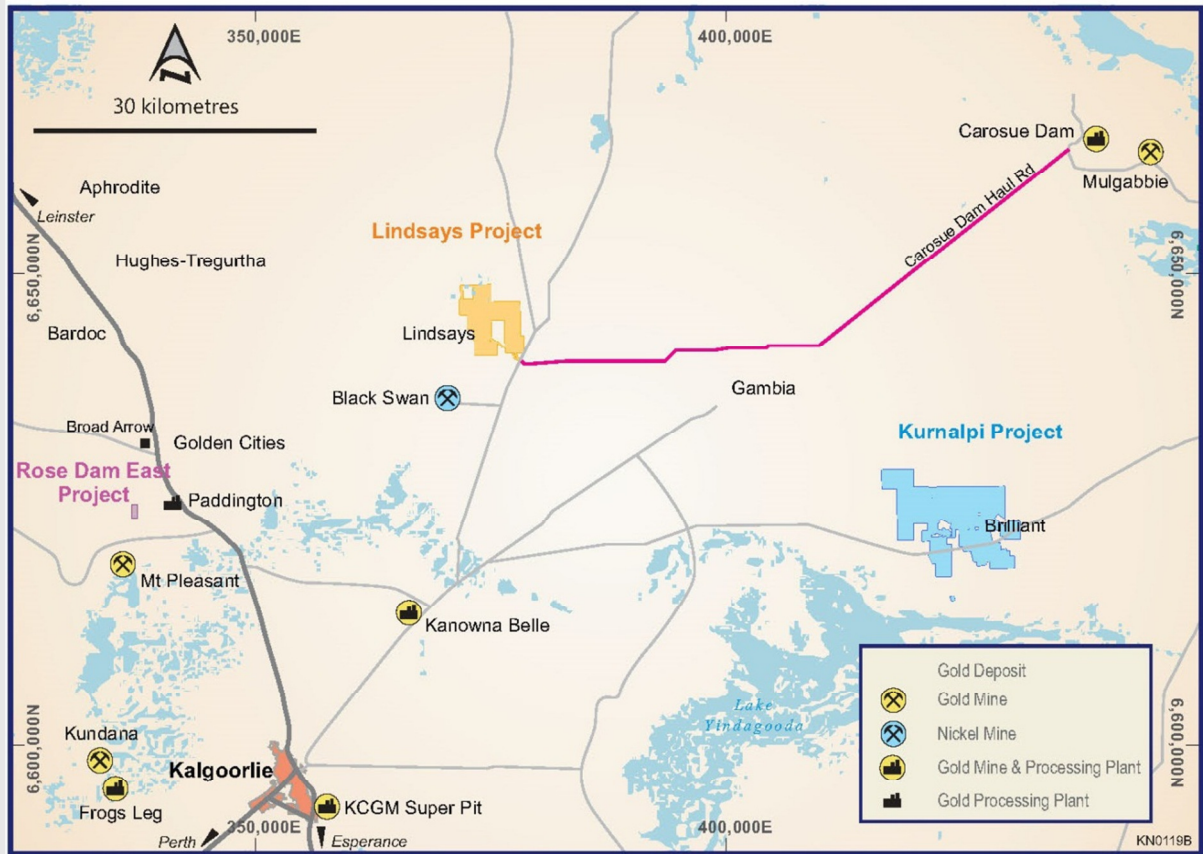

Cash Reserves

Net cash outflows for the September 2018 quarter amounted to approximately \$304,612 (approximately \$277,456 in the previous quarter) of which approximately \$195,472 was attributable

to exploration and evaluation activity. Cash assets at the end of the Quarter were \$693,337 after repayment of the outstanding convertible note and interest of \$1.49 million.

About KalNorth Gold Mines Limited

KalNorth Gold Mines Limited (ASX Code: KGM) is a gold exploration company based in Kalgoorlie, Western Australia (WA). The Company's core suite of tenements, all 100% owned, are located some 50 to 80km north-east of the world renowned gold mining town of Kalgoorlie, WA. There are currently two main gold projects each with resources within the KGM holding: Kurnalpi and Lindsays (collectively the KalNorth Field).

Competent Person Statement-Exploration Results and Mineral Resources

The information in this report that relates to exploration results is based on, and fairly represents information and supporting documentation prepared by Mr Lijun Yang, a Competent Person who is a member of Australian Institute of Geoscientists. Mr Yang is a consultant to the Company. Mr Yang has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Yang consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.
