

## Quarterly Activities Report March 2020

---

### **Kurnalpi Project (100% KGM)**

The Kurnalpi project is located approximately 85km north-east of Kalgoorlie with easy road access. It has been subject to extensive historic small scale gold mining and a number of companies have completed extensive work on this project previously. A series of small to moderate size mineral resources have been defined in the project area and KalNorth is focusing on exploration to define additional resources to increase the potential for development.

During the Quarter, lack of available funds for exploration activity restricted field activity and the Company's extensive ground holding was essentially on a care and maintenance basis. The Covid-19 pandemic and the consequential activity restrictions imposed by the Government also impacted on the ability to carry out field work. The Company continued reviewing exploration potential and targets which were identified from previous works and further drilling programmes will be planned accordingly.

### **Lindsays Project (100% KGM)**

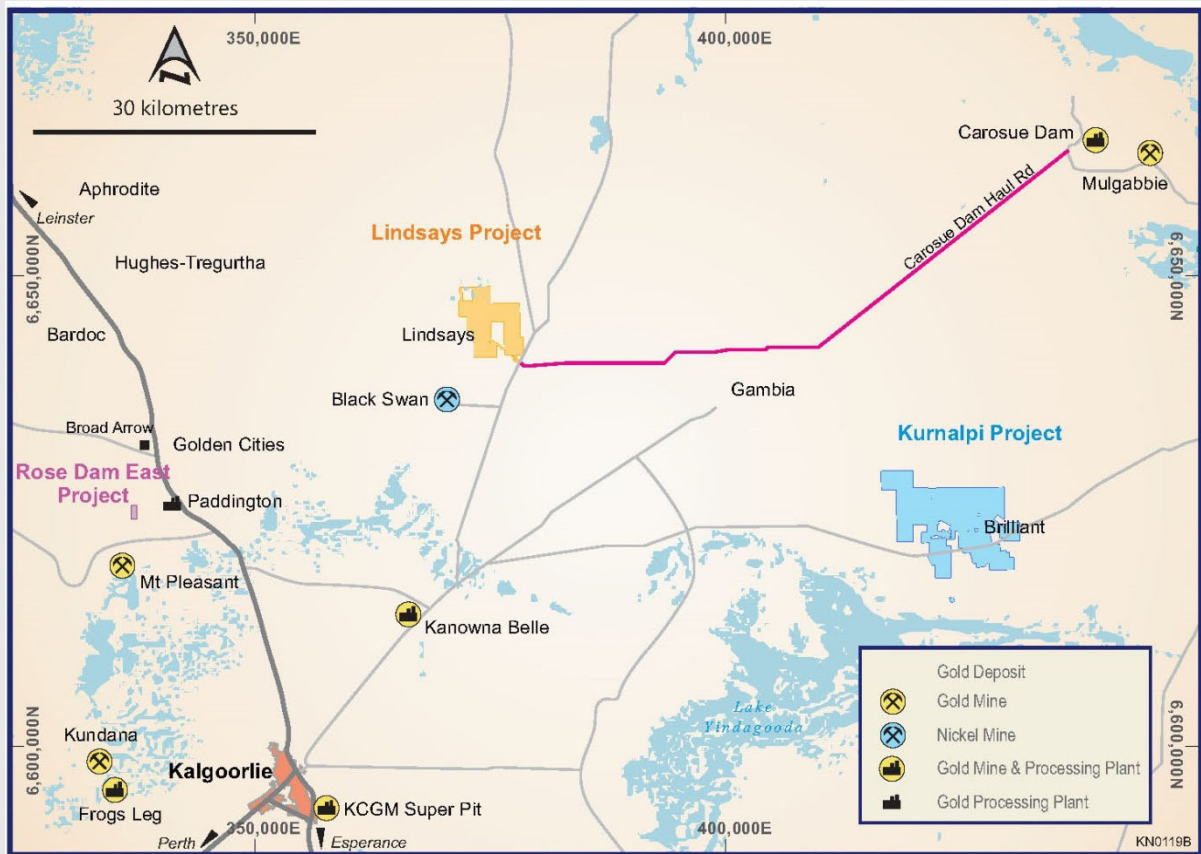

During the Quarter, the Company continues to hold the Lindsays project under care and maintenance and in compliance with environmental regulations which will allow any future mining activity to resume immediately.

The Company continued its strategic review of the project and continues to engage with several interested parties to redevelop or divest the project.

### About KalNorth Gold Mines Limited

KalNorth Gold Mines Limited (ASX Code: KGM) is a gold exploration company based in Kalgoorlie, Western Australia (WA). The Company's core suite of tenements, all 100% owned, are located some 50 to 80km north-east of the world renowned gold mining town of Kalgoorlie, WA. There are currently two main gold projects each with resources within the KGM holding: Kurnalpi and Lindsays (collectively the KalNorth Field).

### Competent Person Statement-Exploration Results and Mineral Resources

*The information in this report that relates to exploration results is based on, and fairly represents information and supporting documentation prepared by Mr Lijun Yang, a Competent Person who is a member of Australian Institute of Geoscientists. Mr Yang is a consultant to the Company. Mr Yang has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Yang consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.*
